

(L792)

Kempsey,  
Barnmouth.

Dec 8<sup>th</sup> 1891

My dear General Pitt Rivers

I was just on the  
start yesterday when  
you got here. We arrived  
at what I make the my  
return at the end of the  
week I shall send you  
two or three startling  
specimens of ware - one with  
a legend the rest different  
in texture & colour &  
as I have just sent you  
I am amassing a good  
collection of bones on the  
proximal end of a femur

most nearly a Keenly  
cut off the edges as  
sharp as when ~~the~~ <sup>the</sup> ~~time~~  
the first cut. The bones  
are discolored and found  
five feet below the surface

I have a hard day tomorrow  
a view. I am in hopes  
the last address I shall  
write you & the club will  
be well received - I  
must take the opportunity  
of commencing my resign-  
ation. It seems extraordinary  
news that have 3  
members on the roll  
The Secretary has come  
upon me for 3 papers  
I hope get off the  
third however as the

Address is rather a long  
one - I remain
