

Collecting material illustrating the later Stone
Age in different countries, I have been more
fortunate and successful than I ever hoped to be,
and I now have valuable data and specimens
for a comparative study of that interesting
subject.
Hoping that this will find you well,
with cordial best wishes, believe me

Yours very truly
Geno H. Pitt-Rivers

Dear General Pitt-Rivers,

About two years ago
you kindly sent me volumes I & II on the
results of your elaborate excavations and researches
in Cranbourne Chase. I have lately had occasion
to look through carefully that truly monumental
labor of yours, and have done so with intense
interest and great admiration. If in some other
countries your example could be followed, how
many yet obscure problems relating to historic
and prehistoric Ethnology would find their
solution!

I should like to show your volumes at one of
the meetings of our Anthropological Society and
say something on the grand task you have
undertaken. I trust that you have no objection
to my doing so; and should be obliged if, in
case you have published any sequel to the second
volume, you will kindly inform me and possibly
let me have a copy of any later volume. In
your letter to me two years ago you mention
a third volume then going through the press.
Since I last wrote to you I have steadily gone on

Dear General Pitt-Rivers

About two years ago
you kindly sent me volumes I & II of the
results of your elaborate excavations and researches
in Carboniferous Chase. I have lately had occasion
to look through carefully that truly monumental
labor of yours, and have done so with intense
interest and great admiration. If in some other
countries your example could be followed, how
many yet obscure problems relating to history
and prehistoric ethnology would find their
solution! I should like to show your volumes at one of
the meetings of our Anthropological Society and
say something on the ground that you have
undertaken. I trust that you have no objection
to my going so, and should be obliged if, in
case you have published any paper to the same
volume, you will kindly inform me and possibly
let me have a copy of any later volume. In
your letter to me two years ago you mentioned
a third volume then going through the press.
Since I last wrote to you I have steadily gone on
