February 8. 1892

My dear General Pitt Rivers

I am no longer
delay writing to ask
how you are progressing
towards recovery - be
hope & hear you are
no longer in weakness
and suffering. I was
in some anxiety on
account of my wife
for several days. The
suffering went to her
heart. It always attacks
the weak organ of the
Victims. She faints im-
mediately, but I thank God

She is now fairly
recovering. Thank
you much for the
labels affixed to the
pottery which are much
valuable & will be
useful when I tabulate
these relics for a paper.
From the labels there
appears to be no doubt
that the Bayan Plate
has the composition for
all the pottery of the
neighborhood. I do not
intend giving up the
examination of the
kils until I have got
the last shed. I am always
finding something the
last is a Guern (under stone)

also the arc of circular
piece of worked Hemmied
Shale, the same dimension.
I think of the latter what
it shows ~~the~~ an elbow $\frac{13}{10}$
inches from the circumference
which is nearly 2 inches thick.

I must go to the drawing. (Copy
of the technical education
Mrs. Stowell tells me she
found an abundance of the
Hemmied ones at the Cup (Cups
kils, as they are very scantily
distributed & the inland
excavations so very rare
that the Shale Industries were
