

1826

Oct 24. 1892

WHATCOMBE,
BLANDFORD.
—AND TELEGRAPH—

My dear General Pitt Rivers

I have been hard
at work plotting
with Kemble & if the
is staying here, in hopes
of stirring up the Hodge &
this estate, who are satyri-
cated with Gladstonian lies
& Arnold's promise of 200
the Landlord & make Lord
Landlord & Gentleman.
Chaplin has been a quick
in this direction. I hope
if the measure is carried
the sale of our land will
be permitted & not
compulsory as that
mountain. So I have
proposed. I intend if possible
to ask Mr. Bagnall
Thoroughly & not lose a

behind. I shall then
gather together all my notes
& as you suggest will
illustrate the paper with
the best subjects. I have
not yet had time to per-
use Struelli's concept -
ment of pottery which you
tell me you have kindly
collected. When this political
business is over I shall be
able to resume my usual
agreeable work & will
write to you again. You
would send me a pair (of?)
which you (arrangement) propose
to have from at Sunket &
The Wilmot & Bradys bed -
To this there are two objections
The nearest appearance of
them bed on at Blackdown
near Alford - about 15 miles off

and - the form is that of a little
Equine Caballus did not appear
on the stage of animal life
until the close of the Pliocene
& just before the Glacial Age
I have so glad you are better
and I trust you will be
able to resume your work
with you usual energy &
perseverance.

We had my little snow last
week - only about 7 inches
which disappeared in the
month of

I remain with our kindest
~~and~~ regard to yourself &
Mrs Pitt Rivers

Your most truly
L. Mansel Pleydell
