

Arch

L855

British Museum.

W.C. 25 April 1892.

My dear Pitt Rivers

I send you the parcel
of flints from Le Moustier & hope
it will reach you in time.

As you know this station stands
nearly by itself in France, as
there are a few implements of
the true drift type found there, of
which however I have none to
spare. They are not of the S^t Acheul.

thick & pointed type, but flat
oval implements like Abbville.

one of the peculiarities of La Motte

are the strange choppers, of which

I send you two good examples,

& which are not unlike the flints

from one station in Suffolk.

Ever yours truly

Augustus W. Franks.

I will also send you a small

series of flints from Bruniquet, found
with the wonderful carvings in mammoth
ivory & reindeer horn, but they are
of typical cave forms & small.
