

If I have time I will
make an epitome of Mr
Buckman's paper & try
& popularize it I have
so much to read I
cannot find time enough
to do it - I was present
enough to agree to recite
an (orally) (orally) being
academ & help in the
'Technical' which will
be absorbed I fear by the
masses. In the recent
of prayer & skilled labour
& the exclusion of the pupils
I shall send you in a day
two "The Results of Ten years' Work

WHATCOMBE,
BLANDFORD.
-AND TELEGRAPH-

My dear General Pitt Rivers

I was much pleased
to receive your friendly
letter this morning and
am not in the least
surprised that you remark
upon the far-aped subject
of Sir John's paper which
has no connection either
directly or indirectly with
Dorsetshire. Winton Street
is odd in their thing - I
had some difficulty in
getting Mr. S. S. Buckman's
paper in our Programme
on account of its having
no relation with the

British Association. It
not only deals with the
great question of the relations
of the Gulf of St. Lawrence with
the seas and Superior
Basin but also as to
the geological gap in the
Superior Basin which
Mr. Meekman thinks he
has filled up at Grand
Rapids and the neighborhood
I have been compelled by
the Board of Trustees to suspend
my work there until
the autumn as he could
not open the $\frac{1}{4}$ acre out
of the 1500 acres he rents
of my estate! Shall
I prepare a Paper upon
the materials I have got
together now or wait for the

autumn to conduct the
examination? I shall
be glad of your opinion
Mr. Stewart has placed
me in a predicament. I
undertook to ~~undertake~~ take
on the Presidency on condition
that he continued to be the
Secretary. I understood
this was agreed to, but to
my surprise, his
recognition stand me in
the face which I had to
read of the meeting in
not a very admirable manner
The Report of the Meeting in
the D.C. is miserable. They
have no good Report &
depend upon the action
to be taken on their remarks
before hand. This I deemed
to be a ~~very~~ ~~important~~ ~~matter~~
