June 5. 1892

WHATCOMBE,  
BLANDFORD.  
—AND TELEGRAPH—

My dear General Pitt Rivers

I am so glad  
you cannot give a better  
account of yourself I hope  
the late warm weather  
could have restored you  
I have most pleasant  
recollections of the days  
and (one of the) evenings  
when the study of Helminth  
phenomena is so acceptable  
Have you scraped South of  
France? If not it will  
give me great pleasure  
to send it to you. The  
has finished La Brouche  
I should recommend you  
to visit it which is  
grand. You will enjoy the  
magnificent view for guests

I am glad you intend  
attaching a day-business  
and have been looking  
forward to it for some  
time. I expect you will  
elicit some new &  
interesting facts connected  
with Palestine from  
10 days' extensive intelligence  
is rather discouraging to  
some of the glances  
surrounding the glances  
name is still dazzling the  
eyes of the electors who without  
consideration follow him to  
unprofitably about the  
resistant mountains both  
from off the de'cadance & 'Aryle  
look to England as he  
when England was  
zeal of prosperity and  
we should as soon as  
a man had could be seen  
in the horizon - we smiled  
when we read the little book  
a change has seen come on  
in the clouds even the sky

and I believe we have  
entered July into the stage  
of dissolution more than  
the instrumentality of the  
glances. When whole of the  
dream to complete the  
dissolution by a summary  
process. If the election day  
turn out more than  
in this more than  
we have been having good meetings  
around here in favor of  
who is now staying at  
when the harvest is finished  
glances my work at the  
complete my work at the  
Krofta Kila when I expect to  
find great interest, value of  
the Post-Bro. period. Hoping  
that you will derive very much  
benefit from the treatment of  
do somewhat of both my hands  
regard you. I remain  
with you. I remain  
your most truly  
E. C. Mendenhall
