WHATCOMBE,
BLANDFORD.
—AND TELEGRAPH—

Nov 21. 1892

My dear General Pitt Rivers

We were delighted to receive your favourable account of Willy. The fiducial bones when broken soon right themselves if not displaced after being set. It was a terrible accident for him & I trust to be laid up at the beginning of the season. I shall work a mure with Cornhill etc early in the Spring. The *Brachy-Helic* is yielded by some few shells a grey of brown - was somewhat resembling No 2 - pl 106 the *Brachy-Helic*, never complete

5 mm

another rather similar to Woodcut p. 35. of 9. and the bottom of another century, very fine-grained *Helic*

I have also 2 coins the
figure, legend & obverse
one is very thick $1\frac{3}{4}$ inch
diameter. I hope to be
able to make a fair sketch
of them when the excavations
are finished.

Yours
Gerrard

Your most truly
H. Maecius - Meydell
