Dear General Pitt Rivers,

Just at present  
I am busy with a  
lecture on British Mammalia  
but next week will try  
and look you out some  
specimens from our Drift

We have found no fresh  
ones for some time past  
Milford Hill is built over  
and Nemerton Pits not  
worked so there is little  
chance of adding to our  
local specimens -

Your additions to the  
Village Museum must be very  
instructive & just what is  
wanted to diffuse a more general  
knowledge on these subjects -  
The easiest way of teaching  
is always through the eye -  
a specimen gives a clearer  
and better idea than pages  
of letter press.

With kind regards

Yours very truly

H. P. Blackmore.
