Blandford 27th July 1886

Dear General Pitt-Rivers,

A short time since you decided the "Gimt" should be removed out this spring as soon as all fear of frost is has passed & I think it can safely be done in about a month from the present time & I will take care to bring it under your notice that the work is carried out.

I in Sept last made it known that you intended it should be done this season - it is quite absurd to talk of a subscription for so small a matter -

I yesterday saw the Doctor & the District Surveyor of Bournemouth & they both told me there were not many other out of work at Bournemouth.

I remain

Yours obedt. Servant

Apreece
