LOCKERIDGE.

MARLBOROUGH.

23 Dec: 1893.

C. E. PONTING, F.S.A.  
ARCHITECT.  
DIOCESAN SURVEYOR.

Dear Sir,

The copper on the  
dome at Donhead owes its  
colour to a chemical  
process which affects the  
surface only, but which is  
very permanent in its effect.  
I have written to Mrs. <sup>?</sup>

Ernest & Sons who did this,  
requesting them to arrange  
with you to treat your  
dome in the same way.

As I did not hear  
further from you on the  
subject I conclude you  
did not follow up your  
idea of exposing the  
old stonework on the  
interior of Toller Royal Ch.

Hoping you are <sup>now</sup> in better  
health, I am, Sir, your faithful

L<sup>th</sup> Serv: A. Pitt-Rivers.

Chas. W. Martin
