

Anthropological Institute
of Great Britain & Ireland,
4, St. Martin's Place, W.C.

6/7/1883.

Dear General Pitt Rivers,

Your letter has set
me at ease about the
Presidency. I was really
quite anxious about the
matter, and feared a very
awkward hitch. No
one can follow you more
worthily than Prof. Flower
and I am sure his election
will be popular with our Members.

As for my own office,
I should be so vexed to think
that my retirement would
in any way injure the interests
of the Institute that I am
inclined, at your request,
to hold on for a while.

I wish we could get
"Krao" - the so-called
"Missing Link" from the
Aquarium - exhibited
at the Institute. I suppose
you do not know anyone
who could assist us in the
matter. Very faithfully,
F. W. Rudler.
